SUMMARY

Software Engineering graduate and Full-Stack Developer with hands-on experience building web applications using the MERN stack—MongoDB, Express.js, React, and Node.js—as well as Python, Django, Django REST Framework, and PostgreSQL. Experienced in RESTful APIs, authentication, role-based access control, responsive interfaces, database-driven workflows, e-commerce applications, Git, and debugging. Currently developing a client-facing React platform at Havit while contributing to project-based full-stack applications and AI/ML projects.

TECHNICAL SKILLS

- **MERN Stack:** MongoDB, Express.js, React, Node.js
- **Languages:** JavaScript (ES6+), TypeScript, Python, HTML5, CSS3
- **Frontend:** React 18/19, JSX, React Router, Vite, Tailwind CSS
- **Backend & APIs:** Django, Django REST Framework, Node.js, Express.js, RESTful APIs
- **Databases:** PostgreSQL, MongoDB, MySQL, Prisma
- **AI/ML & Tools:** scikit-learn, pandas, NumPy, collaborative filtering, Google Gemini API, Git, GitHub, Vercel

PROFESSIONAL EXPERIENCE

Software Developer Intern — Havit, Remote

Sep 2026 – Present

- Developing the TSC Lab client-facing platform for a Korean skincare manufacturing and private-label business using React 18, JavaScript, JSX, React Router v6, and Vite.
- Translated business requirements and design references into reusable React components, shared layouts, and responsive interfaces across desktop, tablet, and mobile breakpoints.
- Built an interactive skincare formulation and quotation-request experience using component-based architecture, CSS variables, design tokens, Flexbox, CSS Grid, and responsive media queries.
- Deployed and tested the application through Vercel while managing tasks in ClickUp and collaborating with Development, SQA, and Marketing teams through Google Meet and Google Chat.

Full-Stack Development Intern — CodeAlpha, Remote

Project-Based | 1 Aug 2026 – 31 Aug 2026

- Delivered [Klyro](#), a real-time multi-tenant project-management platform, using React, TypeScript, Node.js, Express.js, Socket.IO, PostgreSQL, and Prisma.
- Implemented role-based access control for three user roles—Owner, Admin, and Member—by designing synchronized Kanban workflows and permission-aware application behavior.

Full-Stack Development Intern — Decode Lab, Remote

Project-Based | 1 Aug 2026 – 31 Aug 2026

- Built [14th Street Pizza](#), a full-stack e-commerce ordering application, using React, TypeScript, Vite, Node.js, Express.js, and Zod.
- Delivered a six-stage product-customization flow by creating responsive interfaces, reusable frontend components, and API-connected order workflows.

Software Development Intern — Qwetrum Technologies, Remote

Project-Based | Jun 2026 — 1 month

- Developed NovaMart, a complete e-commerce web application, by implementing Home, Shop, Product, Cart, and Checkout customer journeys.
- Implemented product search, filtering, sorting, and browser-persistent cart functionality using JavaScript and frontend state-management patterns.

SELECTED PROJECTS

SunGrid — AI-Powered Solar Marketplace — [SunGrid Live](#)

Jun 2025 – Jun 2026

- Architected and deployed a 56-screen marketplace using React, Python, Django REST Framework, and PostgreSQL for customer, seller, and admin workflows.
- Delivered nearly 40 RESTful API endpoints across nine PostgreSQL-backed Django models and built a collaborative-filtering recommendation engine using scikit-learn, pandas, NumPy, NearestNeighbors, and cosine similarity.

NAYAB — Fine Watchmaking Digital Flagship — [NAYAB Live](#)

2025 – 2026

- Architected a full-stack e-commerce platform using React, TypeScript, Node.js, Express.js, Prisma, and PostgreSQL across product, cart, checkout, and order workflows.
- Created a premium responsive storefront with GSAP-driven interactions and accessibility-focused UI behavior; added immutable order and price snapshots.

EDUCATION

BS Software Engineering

Sep 2022 – Jun 2026

National University of Modern Languages (NUML)

- Coursework: Database Systems, Web Development, Software Engineering, Data Structures & Algorithms, Object-Oriented Programming, and Problem Solving.
- Completed applied academic and self-directed software projects spanning full-stack development, databases, APIs, AI/ML, and responsive web applications.
